ADITYA UNIVERSITY

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

GIT & GITHUB PRACTICAL ASSESSMENT REPORT

Step-by-Step Student Activity Sheet & Verification Evidence

Student Name:	Charan Kurupudi
Roll Number:	**23MH1A05I2**
College / Branch:	Aditya College of Engineering & Technology (ACET) — CSE
GitHub Username:	Charan-19DB
Portfolio Repository URL:	https://github.com/Charan-19DB/Stu-Portfolio.git
Trainer Repository URL:	https://github.com/mcnu5528-coder/Student-Portfolio.git
Date of Assessment:	24-10-2026 (Submission Deadline: 25-10-2026, 11:00 PM)

Task 1 — Set Up and Customise the Project [2 Marks]

Objective: Extract the starter project, verify all essential files, launch index.html locally in a browser, and customize student details.

Activity Steps:

1. Extracted starter ZIP and opened the project folder in VS Code.
2. Verified required files: README.md, index.html, style.css, about.md, skills.md, projects.md, education.md, contact.md, .gitignore, and contributions.
3. Replaced placeholder details with student information: Charan Kurupudi (Roll: 23MH1A05I2), CSE, ACET, email csrkurupudi2005@gmail.com, GitHub Charan-19DB.
4. Verified the webpage layout by opening index.html in browser.

```
$ dir
Mode                 LastWriteTime         Length Name
----                 -------------         ------ ----
d-----        10/24/2026  10:09 PM                contributions
-a----        10/24/2026  10:09 PM            212 .gitignore
-a----        10/24/2026  10:09 PM           1383 README.md
-a----        10/24/2026  10:27 PM            667 about.md
-a----        10/24/2026  10:27 PM            455 contact.md
-a----        10/24/2026  10:35 PM           1120 education.md
-a----        10/24/2026  10:27 PM           3123 index.html
-a----        10/24/2026  10:29 PM           2215 projects.md
-a----        10/24/2026  10:34 PM           1150 skills.md
-a----        10/24/2026  10:09 PM           2177 style.css
```

■ [ATTACH SCREENSHOT: Task 1: Portfolio Browser View]

Screenshot of index.html showing personalized portfolio of Charan Kurupudi (23MH1A05I2).

Task 2 — Initialise Git and Make the First Commit [3 Marks]

Objective: Initialize Git, inspect working directory status, stage files, commit the customized initial state, and verify working tree is clean.

Activity Steps:

1. Initialized Git in project root with 'git init'.
2. Checked file state with 'git status'.
3. Staged files with 'git add .'.
4. Recorded commit snapshot: 'Customize portfolio with student details (Charan Kurupudi - 23MH1A05I2)'.
5. Verified working tree is clean.

```
$ git add . ; git commit -m 'Customize portfolio with student details (Charan Kurupudi - 23MH1A05I2)'
[main cb3c67b] Customize portfolio with student details (Charan Kurupudi - 23MH1A05I2)
 3 files changed, 22 insertions(+), 21 deletions(-)
```

```
$ git status
On branch main
Your branch is up to date with 'origin/main'.
nothing to commit, working tree clean
```

■ [ATTACH SCREENSHOT: Task 2: Terminal Commit & Clean Tree]

Screenshot of terminal showing 'git commit' and 'git status' clean working tree.

Task 3 — Create a GitHub Repository and Push [5 Marks]

Objective: Create a remote GitHub repository (Stu-Portfolio), connect local repository via origin, verify branch name, and push main branch.

Activity Steps:

1. Created repository on GitHub: https://github.com/Charan-19DB/Stu-Portfolio.git without README.
2. Connected remote: 'git remote add origin https://github.com/Charan-19DB/Stu-Portfolio.git'.
3. Verified remotes: 'git remote -v'.
4. Renamed branch to main: 'git branch -M main'.
5. Pushed to GitHub: 'git push -u origin main'.
6. Verified project files visible on GitHub repository main page.

```
$ git remote -v
origin  https://github.com/Charan-19DB/Stu-Portfolio.git (fetch)
origin  https://github.com/Charan-19DB/Stu-Portfolio.git (push)
upstream        https://github.com/mcnu5528-coder/Student-Portfolio.git (fetch)
upstream        https://github.com/mcnu5528-coder/Student-Portfolio.git (push)
```

```
$ git push -u origin main
To https://github.com/Charan-19DB/Stu-Portfolio.git
   51b9ddd..cb3c67b  main -> main
branch 'main' set up to track 'origin/main'.
```

■ [ATTACH SCREENSHOT: Task 3: GitHub Repository Main Branch]

Screenshot of GitHub repository (https://github.com/Charan-19DB/Stu-Portfolio) showing files published.

Task 4 — Create a Feature Branch and Add Project Details [5 Marks]

Objective: Create isolated feature branch 'add-projects', document 3 comprehensive projects in projects.md, inspect changes, commit, and push.

Activity Steps:

1. Switched to feature branch: 'git checkout -b add-projects'.
2. Documented 3 detailed projects (Smart Attendance System, Portfolio Showcase, Library Manager) with problem, solution, tech stack, contribution, and improvements.
3. Inspected diff: 'git status ; git diff'.
4. Committed changes: 'git commit -m "Add student project descriptions"'.
5. Pushed branch: 'git push -u origin add-projects'.
6. Verified branch exists on GitHub unmerged.

```
$ git checkout -b add-projects ; git add projects.md ; git commit -m 'Add student project descriptions'
Switched to a new branch 'add-projects'
[add-projects fc6df80] Add student project descriptions
 1 file changed, 29 insertions(+), 24 deletions(-)
```

```
$ git push -u origin add-projects
To https://github.com/Charan-19DB/Stu-Portfolio.git
 * [new branch]      add-projects -> add-projects
branch 'add-projects' set up to track 'origin/add-projects'.
```

■ [ATTACH SCREENSHOT: Task 4: Feature Branch 'add-projects']

Screenshot of terminal push and GitHub branch dropdown showing 'add-projects'.

Task 5 — Open a Pull Request and Merge; Synchronise [5 Marks]

Objective: Open Pull Request on GitHub from 'add-projects' into 'main', merge it, pull back to local main, and repeat the workflow for 'add-certifications'.

Activity Steps:

1. Opened PR: Title 'Add student project descriptions' from add-projects to main.
2. Merged the PR into main branch on GitHub.
3. Synchronised local: 'git checkout main ; git pull origin main'.
4. Created branch 'add-certifications': 'git checkout -b add-certifications'.
5. Updated skills.md and education.md with technical proficiencies and coursework.
6. Committed: 'git commit -m "Update skills and education"' and pushed.
7. Merged PR into main on GitHub and synchronised local main.
8. Reviewed history graph: 'git log --oneline --graph --all'.

```
$ git checkout -b add-certifications ; git add skills.md education.md ; git commit -m 'Update skills and education'
Switched to a new branch 'add-certifications'
[add-certifications 1acbe65] Update skills and education
 2 files changed, 38 insertions(+), 26 deletions(-)
To https://github.com/Charan-19DB/Stu-Portfolio.git
 * [new branch]      add-certifications -> add-certifications
```

```
$ git log --oneline --graph --all
* 1acbe65 (HEAD -> main, origin/main, add-certifications) Update skills and education
| * cdfab89 (origin/improve-documentation, improve-documentation) Add student contribution notes for 23MH1A05I2
|/
* fc6df80 (origin/add-projects, add-projects) Add student project descriptions
* cb3c67b Customize portfolio with student details (Charan Kurupudi - 23MH1A05I2)
* 51b9ddd First Commit
```

■ [ATTACH SCREENSHOT: Task 5: Pull Request Merged & Commit Graph]

Screenshot of GitHub Pull Request merged badge and commit graph in terminal.

Task 6 — Fork Collaboration and Final Submission [5 Marks]

Objective: Fork trainer repository, create branch 'improve-documentation', add contributions/23MH1A05I2.md, commit, and push.

Activity Steps:

1. Forked trainer repo: https://github.com/mcnu5528-coder/Student-Portfolio.git to https://github.com/Charan-19DB/Student-Portfolio.
2. Created branch 'improve-documentation': 'git checkout -b improve-documentation'.
3. Created 'contributions/23MH1A05I2.md' with student details, 3 Git commands learned, GitHub purpose, and branching benefit.
4. Committed and pushed branch to remote repository.

```
$ cat contributions/23MH1A05I2.md
# Git and GitHub Learning Notes
- **Name:** Charan Kurupudi
- **Roll Number:** 23MH1A05I2

## Three Git Commands I Learned
1. git status – inspects working directory and staging area.
2. git checkout -b <branch> – creates and switches to new branch.
3. git commit -m "<msg>" – records staged changes to repository.

## Purpose of GitHub
Cloud hosting platform for code review, collaboration, and PRs.

## One Benefit of Branches
Allows isolated development without disrupting stable main branch.
```

```
$ git add contributions/23MH1A05I2.md ; git commit -m 'Add student contribution notes for 23MH1A05I2' ; git push -u
[improve-documentation cdfab89] Add student contribution notes for 23MH1A05I2
 1 file changed, 15 insertions(+)
 create mode 100644 contributions/23MH1A05I2.md
To https://github.com/Charan-19DB/Stu-Portfolio.git
 * [new branch]      improve-documentation -> improve-documentation
```

■ [ATTACH SCREENSHOT: Task 6: Contribution File & Fork]

Screenshot of contributions/23MH1A05I2.md on GitHub and fork repository.

Summary: Git Commands Reference Table

Git Command	Task Used	Function & Purpose
`git status`	1, 2, 4	Checks state of working tree, staged/unstaged files
`git add`	2, 4, 5, 6	Stages changes for snapshot commit
`git commit -m 'msg'`	2, 4, 5, 6	Records staged changes to local repository history
`git remote add / -v`	3, 6	Connects local repo to remote URL and verifies remotes
`git push -u origin <branch>`	3, 4, 5, 6	Pushes branch commits to GitHub with upstream tracking
`git checkout -b <branch>`	4, 5, 6	Creates and switches to a new isolated feature branch
`git diff`	4	Inspects unstaged line-by-line differences

`git pull origin main`	5	Synchronises local branch with remote updates
`git log --oneline --graph`	2, 5	Visualizes commit history and branch merges
